

316 Stainless Steel 90 Degree

Handrail Tee

As the professional manufacturer, POWER MARINE would like to provide you high quality 316 Stainless Steel 90 Degree Handrail Tee. And we will offer you the best after-sale service and

timely delivery. We follow the quality of rest assured that the price of conscience, dedicated service. We have been specialized in marine hardware for more than 25 years. Our product is made of 316 stainless steel, which has good corrosion resistance. We can provide high quality products and competitive prices, and we look forward to becoming your long-term partner in China. Welcome to contact us.

316 Stainless Steel 90 Degree Handrail Tee

Product Introduction

POWER MARINE is a professional China 316 Stainless Steel 90 Degree Handrail Tee manufacturer and supplier, if you are looking for the best 316 Stainless Steel 90 Degree Handrail Tee with low price, consult us now! We follow the quality of rest assured that the price of conscience, dedicated service. 316 Stainless Steel 90 Degree Handrail Tee has a longer service life in seawater, ultraviolet light and humid environments. We can provide high quality products and competitive prices, and we look forward to becoming your long-term partner in China. Welcome to contact us.

Product Parameter (Specification)

Product name	316 Stainless Steel 90 Degree Handrail Tee
--------------	--

Shandong Power Industry and Trade Co., Ltd.

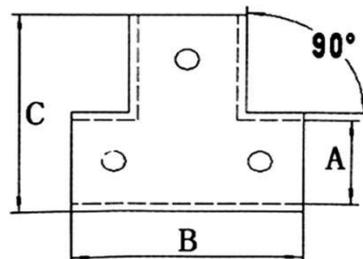

Address: Chengyang District, Qingdao, Shandong Province, China

Tel: [+86-15865772126](tel:+86-15865772126)

[+86-0532-83875707](tel:+86-0532-83875707)

E-mail: andy@hardwaremarine.com

Specification available	Multiple sizes
Standards that follow to	ISO 9001, CE, TUV, CSS, SGS.
Samples available	Yes.
Packing method	Bubble bag+Wooden carton
Production lead time	10-15 days for a 20ft container, 20-25 days for a 40ft container.
Warranty time	Support returns and exchanges
Payment term	T/T
FOB loading port	Qingdao China

Code	A mm	B mm	C mm	Size
PM5449-22	22.5	52	51	7/8"
PM5449-25	25.5	53	51	1"
PM5449-30	30.6	76	83	1-1/5"
PM5449-32	32.5	76	88	1-1/4"

Product Feature And Application

The history of 316 Stainless Steel 90 Degree Handrail Tee can be traced back to the development of stainless steel as a material for various applications. Stainless steel was first discovered in the early 20th century by metallurgist Harry Brearley of Sheffield, England. He attempted to develop a corrosion-resistant material for gun barrels. He realized that adding chromium to steel could improve its corrosion resistance. In the 1950s, the American Iron and Steel Institute (AISI) introduced a stainless steel grading system to classify stainless steel into different grades based on composition and properties. One grade is called 316 stainless steel, which contains about 16-18% chromium, 10-14% nickel and 2-3% molybdenum. The composition provides excellent corrosion resistance, especially in harsh environments such as marine applications or exposure to chemicals. The use of 316 Stainless Steel 90 Degree Handrail Tee has become popular in the construction industry, especially for applications where durability, strength and corrosion resistance are critical. This grade of stainless steel is known for its high tensile strength and ability to withstand extreme temperatures, making it suitable for both indoor and outdoor applications. Over the years, advancements in manufacturing techniques and technology have made it easier to produce 316 Stainless Steel 90 Degree Handrail Tee in a variety of sizes and designs. These 316 Stainless Steel 90 Degree Handrail Tee are widely used in the construction of stairs, balconies and other structures that require a strong and corrosion-resistant handrail system. Today, the demand for 316 Stainless Steel 90 Degree Handrail Tee remains high, especially in industries such as construction, marine and food processing, where hygiene, aesthetics and durability are key factors. Continuous developments in stainless steel alloys and manufacturing techniques ensure that these handrail T-pieces will continue to evolve and meet the ever-changing needs of modern architecture and design.

Product Details

316 Stainless Steel 90 Degree Handrail Tee have several distinguishing features that make them a popular choice for handrail systems:

Corrosion Resistance: The primary benefit of 316 stainless steel is its excellent resistance to corrosion, including rust and pitting. This makes it ideal

for outdoor or marine environments, as well as areas exposed to chemicals or high humidity.

Strength and Durability: 316 stainless steel is known for its high tensile strength, making it a strong and durable material for 316 Stainless Steel 90 Degree Handrail Tee systems. Over time, it can withstand heavy loads, impacts, and general wear and tear.

Temperature Resistance: This grade of stainless steel has good resistance to high temperatures and is suitable for installations exposed to extreme heat or fire.

Aesthetic Appeal: 316 stainless steel has a sleek and polished appearance, adding a modern and stylish touch to any handrail system. It can easily complement a variety of architectural styles and design preferences.

Versatility: 316 Stainless Steel 90 Degree Handrail Tee are available in a variety of sizes and designs and can be customized to meet specific project requirements. It can be seamlessly integrated into a variety of handrail systems, including stairs, balconies, ramps and walkways.

Overall, 316 Stainless Steel 90 Degree Handrail Tee combine strength, durability, corrosion resistance, and aesthetics, making them the first choice for functional and decorative handrail installations.

Loading & Shipment

Thanks to superior quality, we have been establishing a close & long business partner relationship with the customers from more than 30 countries, and we've gotten so many positive feedback regarding the quality.
