

**316 Stainless Steel Delta Anchor**

As the professional manufacturer, Power Marine would like to provide you 316 Stainless Steel Delta Anchor. We are a Marine hardware manufacturer for over 25 years and have plenty of experience. We will provide you Delta Anchor. Our products have a good price advantage and cover most of the European and American markets. We look forward to becoming your long-term partner in China.

316 Stainless Steel Delta Anchor

**Product Introduction**

As a professional supplier of 316 Stainless Steel Delta Anchor, And we will offer you the best after-sale service and timely delivery. The 316 Stainless Steel Delta Anchor made of Beautiful highly polished 316 Stainless Steel. It is durable and corrosion-resistant, making sure a long-term use. Excellent holding power in nearly all bottoms including mud, sand, rock, and coral; One piece design provides superior holding power compared to other styles of anchors, including the plow style.

**Product Parameter (Specification)**

Product name	316 Stainless Steel Delta Anchor
Specification available	Multiple sizes
Standards that follow to	ISO 9001, CE, TUV, CSS, SGS.
Samples available	Yes.
Packing method	Bubble bag+Wooden carton
Production lead time	10-15 days for a 20ft container, 20-25 days for a 40ft container.
Warranty time	Support returns and exchanges
Payment term	T/T
FOB loading port	Qingdao China

### Product Feature And Application

316 Stainless Steel Delta Anchor were originally introduced in the mid-1990s by a company called Lewmar. It was developed as an improved version of the traditional plow anchor, which has been commonly used in boating for many years. Delta Anchor are designed to provide better grip and performance in a wider range of seabed conditions. Its unique triangular fluke shape allows it to penetrate deep into the seafloor and provide a secure hold. The design also helps the anchor reset itself if it becomes detached, minimizing the chance of the boat drifting. The desire for durability and corrosion resistance led to the decision to construct the Delta Anchor in stainless steel.

Stainless steel is known for its strength and ability to withstand harsh marine environments, making it ideal for anchors exposed to salt water and varying weather conditions. Since its introduction, Delta Anchor have become popular with boaters around the world. It is now widely regarded as a reliable and efficient anchoring solution, especially for recreational and commercial vessels.

316 Stainless Steel Delta Anchor is a popular choice among boaters for its durability, reliability, and versatility. The anchor is made from high-quality stainless steel, which provides excellent corrosion resistance and long-term durability in marine environments. The Delta Anchor features a unique design with sharp, pointed flukes and a weighted tip. This design allows for quick and efficient penetration into a variety of seabeds, ensuring a secure hold. The anchor's broad surface area and low center of gravity further enhance its holding power. One of the standout features of the 316 Stainless Steel Delta Anchor is its self-launching capability. It can easily be dropped into the water and self-aligns in the correct direction, reducing the effort required for deployment. This makes it convenient and efficient for boaters.

The versatile design of the Delta Anchor makes it suitable for a wide range of boat sizes and types. It performs well in different soil conditions, including hard and soft seabeds. This makes it a reliable choice for anchoring in various weather and sea conditions. Furthermore, the Anchor is compatible with different types of anchor chains and ropes, allowing for flexibility in anchor setups. It is also easy to store due to its compact size and shape. Overall, the 316 Stainless Steel Delta Anchor is known for its quality craftsmanship, durability, and strong holding power. It is a trusted choice for boaters who prioritize reliability and performance in their anchoring equipment.

### **Product Details**

316 Stainless Steel Delta Anchor have several notable features

**Material:** It is made of high-quality stainless steel, which provides excellent corrosion resistance and ensures durability in marine environments.

**Design:** This anchor has a unique design with sharp flukes and weighted tips. This design facilitates quick and efficient penetration into a variety of seabeds, ensuring secure anchorage.

**Grip:** The Delta Anchor large surface area and low center of gravity contribute to its superior grip, allowing it to maintain a secure grip even in challenging conditions.

**Self-launching:** The Delta Anchor is designed to be self-launching, making it easy to deploy in the water. It automatically aligns in the correct direction, reducing the amount of work required for anchoring.

**Versatility:** 316 Stainless Steel Delta Anchor are suitable for all sizes and types of vessels. It performs well in different soil conditions, including hard and soft sea bottoms, making it suitable
