Item No.	Size	Tube Dia	Step
PM-TW1001	700*480mm	32mm	
PM-TW1002	700*480mm	32mm	With bow roller

## Product Feature And Application

The history of Stainless Steel Platform Teak Wood Folding Ladder is directly related to advances in ship construction and design. Known for its corrosion resistance and strength, stainless steel has been a popular material choice for a variety of marine applications for many years. Teak is also highly valued in the boating industry for its durability, natural beauty, and resistance to water damage. The combination of stainless steel and teak in the ladder structure makes the Stainless Steel Platform Teak Wood Folding Ladder not only practical but also beautiful. These ladders provide boaters with a safe and stable way to access their boats or move between different levels on the boat. The development of folding ladders made it easier for boat owners to store and transport them because they could be folded into a more compact size. This feature is especially important on smaller boats or yachts with limited storage space. Over time, advances in manufacturing technology and design led to the development of more refined and versatile stainless steel platform teak folding ladders. Different variations and customizations are available to suit different boat types and personal preferences. Overall, the history of Stainless Steel Platform Teak Wood Folding Ladder demonstrates the continued innovation and improvement of boating equipment and accessories to enhance safety, convenience and aesthetics for boat owners and enthusiasts.

## Product Details

The Stainless Steel Platform Teak Wood Folding Ladder has several key features that make it a popular choice among boat owners.

**Stainless Steel Construction:** Stainless Steel Platform Teak Wood Folding Ladder frame is made of stainless steel for excellent durability and corrosion resistance, ensuring a long service life even in harsh marine environments.

**Teak Steps:** The steps or rungs are made of teak wood, which adds elegance and natural beauty to the ladder. Teak is also known for its resistance to water

damage and durability.

**Folding Design:** These ladders are designed to be foldable for easy storage and transportation. Folding mechanisms typically include hinges and locking mechanisms that hold the ladder securely in place when in use and ensure easy folding when not in use.

**Platform with handrails:** Many Stainless Steel Platform Teak Wood Folding Ladder come with a built-in platform at the top to provide users with a stable and safe place to stand. Platforms are often equipped with handrails or handrails to enhance safety and stability when getting on and off the vehicle.

**Anti-slip steps:** To prevent slipping and accidents, steps are often designed with anti-slip surfaces. These surfaces can be in the form of ribbed patterns, textured rubber inserts, or other non-slip materials.

**Adjustable or Telescopic Design:** Some stainless steel platform teak folding ladders come with a telescopic or adjustable feature that allows you to extend or retract the ladder to your desired height or length. This versatility is especially useful when dealing with different water levels or dock heights.

Together, these features make the Stainless Steel Platform Teak Wood Folding Ladder a reliable and convenient choice for boat owners, providing safe access to and from their vessel while maintaining the aesthetics and durability required in the marine environment.

## **Loading & Shipment**

Thanks to superior quality, we have been establishing a close & long business partner relationship with the customers from more than 30 countries, and we've gotten so many positive feedback regarding the quality.
